

The UNIFOLD™ Finlock Gutter SOLUTION

AMPTEAM

GUTTER SPECIALISTS • SITE SURVEYS • DESIGN DEVELOPMENT MANUFACTURE • SUPPORT

The Unifold™ gutter lining system was developed for commercial buildings but Ampteam have now developed it to provide a gutter solution for housing associations and home owners. Finlock gutters are often found on domestic buildings where they serve single dwellings to terraced blocks of houses. These gutters are supported on the external walls of properties and any leaks invariably find their way to the inside of the building, causing great discomfort to the occupants and damage to internal walls and decorations.

The Unifold™ membrane will solve this problem.

The Unifold™ installation to these gutters usually requires the removal of the bottom row of slates or tiles to expose the tiling batten. Unifold™ is fitted into the gutter and the roof slope leg extends to this exposed batten. Corner sections and stop ends are factory fabricated, as are outlets.

The final installation provides a leak free system, which will not discharge into the building.

UNIFOLD™

Guarantees & Benefits

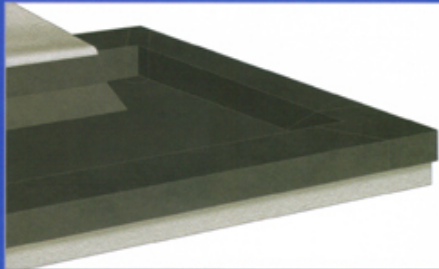

* Long life - 20 year guarantee but made to last in excess of 30 years.

Cost effective - eliminates need to remove or modify existing sheeting.

Easily fixed - fixing techniques follow existing and proven practices

Lightweight - minimal increase to dead and imposed loads

Maximum retained gutter capacity. Existing gutters may be insulated with ease. Leaking gutters will be a thing of the past.

UNIFOLD™ Solution

Each Unifold™ gutter is designed to provide the best possible solution. On occasions this will result in an improvement in size and performance over the original gutter.

Survey

Whenever possible gutters are surveyed by Ampteam personnel. This ensures design accuracy and helps provide the optimum Unifold™ Solution.

Engineered System

Unifold™ is a totally engineered product, manufactured using unique processes. The Machinery employed uses up to date technology providing superior accuracy. Unifold is delivered to site in the most convenient form possible. All fabricated units are supplied fully factory sealed leaving the simplest of site operations to install the system.

This ensures a quality installation every time.

Suitability

Unifold™ is suitable for refurbishing the vast majority of domestic Finlock gutters. Single or multiple hinges ensure that Unifold™ is suitable for the most difficult access solutions.

Unifold™ is a fully engineered system that is designed for each specific lining application. No conditions however unusual or complex, are beyond its capabilities.

Guarantee

The Unifold™ system is backed by a comprehensive 20 year guarantee. This guarantee warrants that the gutter lining is free from defects in material and manufacturing workmanship and installation.

After the installation has been completed, the Ampteam™ approved contractor will issue a 20 year guarantee. However, Unifold™ has been designed to be effective well in excess of 30 years.
